

FindMyAITool is a website dedicated to providing a comprehensive list of AI tools to assist individuals and businesses in finding the most suitable AI tool for their specific requirements.

[Home](#)[About](#)[Blog](#)

The logo needs to be added to the footer.

Also, can you make the logo slightly bigger on desktop.

I think it's currently slightly too small:

The text font looks incorrect throughout the entire website. Clearly, it doesn't match the Figma. I've put some examples here, but there are many more. All typography info should be in the style guide. Also, use the dev mode.

DID YOU KNOW?

AI can improve customer service

AI-powered chatbots and virtual assistants can improve customer service by providing quick and accurate responses to customer inquiries.

How to prompt our chatbot effectively

to relieve accurate, use-case specific AI tool recommendations

We've designed our chatbot to provide accurate, relevant AI tool

1

INTRODUCTION / OVERVIEW

Briefly describe your business or task.

2

SPECIFIC USE CASE/TASK

Clearly state the specific need or task for which you are seeking AI assistance.

3

DESIRED OUTCOME/GOALS

Mention what you aim to achieve with the AI tool.

4

ADDITIONAL DETAILS

Include any additional relevant information such as industry specifics, current challenges, or technical requirements.

Remove this piece of text (in the red box). Also, make the 'we've designed...' text slightly bigger. The result should look like this:

How to prompt our chatbot effectively

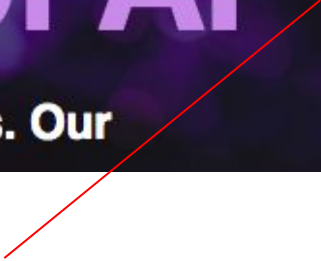

We've designed our chatbot to provide accurate, relevant AI tool recommendations.

[Learn more](#)

The text is too close to the edge of the box. There should be some more empty space, like these other ones:

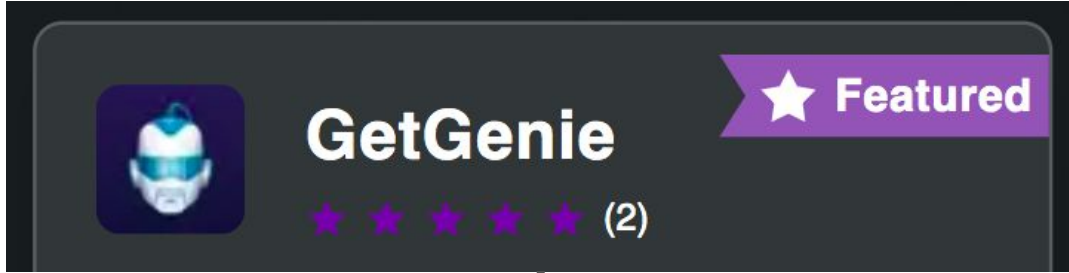

Unlock the Power of AI

Save time researching AI tools for your business. Our

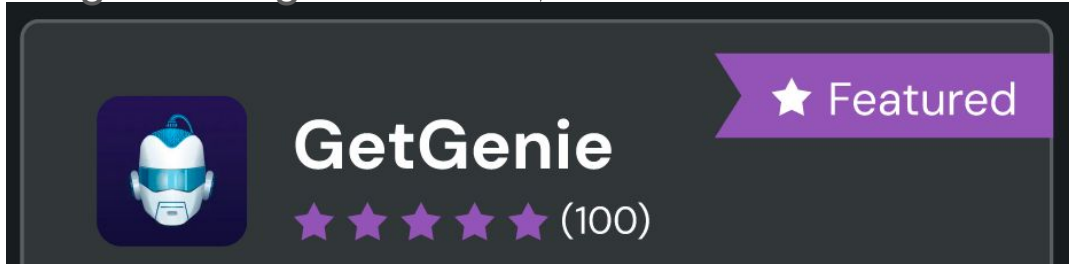

There is this black line in the background image. It is only on desktop I think. It is also in the Figma design. Please try and find a solution, because the background image file doesn't have this problem.

Current website:

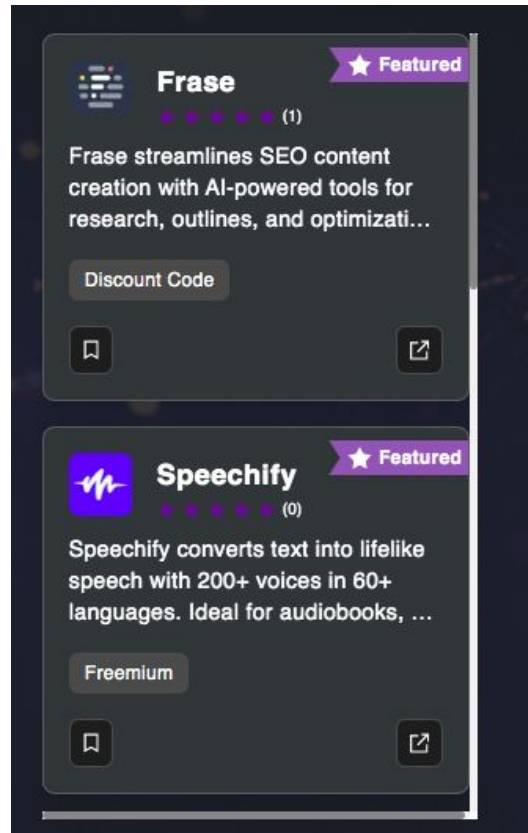

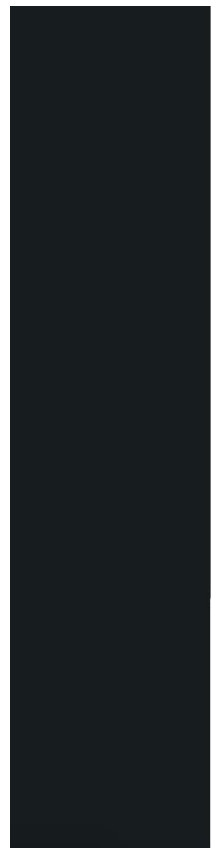

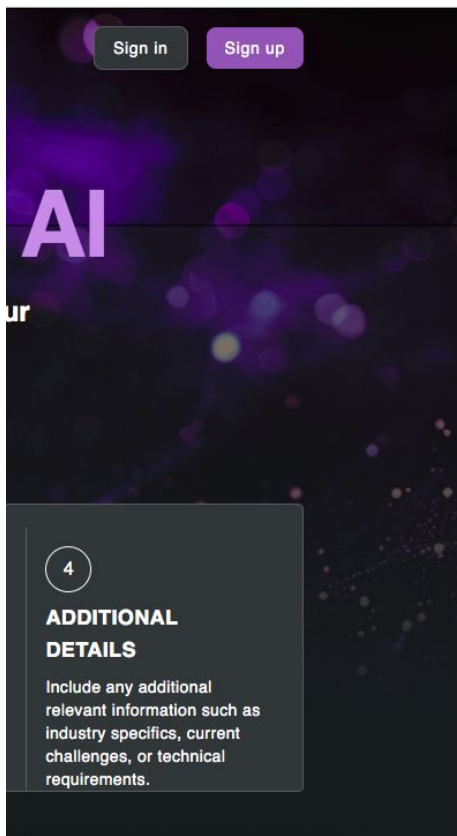

Figma design:

(This is for all directory listing boxes/listings (on the homepage), I'm just using GetGenie as an example)

1. The 'Featured' component is not 100% correct. In the Figma, the star icon is smaller, the text is perfectly in-line with the star vertically, and the font of the text is lighter.
2. The ratings stars don't look the same. The colour is not correct (too dark). The size is not correct (slightly too small). Also, the placement is not 100% correct: in the Figma design, the bottom of the stars is in-line with the bottom of the AI tool icon image. In the current website, the stars are slightly too low.
3. The text 'GetGenie' is slightly too far from the icon image (of course this is a very minor detail)

Please remove all scroll bars from the website if possible. They don't look good.

When I enter a prompt in the chatbot, the loading wheel appears (which is correct).

But, the components below the chatbot move upwards. As you can see, the distance starts as the green line, but is reduced to the red line.

The formatting/layout of the page should not change when the a prompt is entered into the chatbot.

Also, is it possible to change the colour of the loading wheel to the same purple as the is used throughout the rest of the website? Because currently it's blue (which fits the old design colours).

Speechify is a popular AI-powered text-to-speech platform that converts written text into lifelike speech in 60 languages. It's designed for users who want to consume content faster and more efficiently, making it ideal for students, professionals, content creators, and people with reading difficulties like dyslexia or ADHD. The platform offers high-quality, natural-sounding voices, allowing users to listen to documents, PDFs, and web articles while multitasking. With support for a range of devices and platforms, including iOS, Android, and Chrome, Speechify makes it easy to listen to content on the go.

Productivity and Workflow Automation

Voice and Speech Recognition

Education and E-learning

On the directory listing pages, the icon image is incorrect.

It is not correct for the name of the AI tool.

Also, it should not look blurry like this.

On the chatbot results pages, the AI tool icon images are all blurry.

Sometimes the profile picture doesn't show - or takes a long time to load - on the profile page.

Please test and see if you have the same problem.

(Maybe it's just my internet connection being slow lol)

Here, it should show the prompt that the user entered in the chatbot. In this example, it should say 'I'm looking to promote an online business'. The user's prompt should be shown here.

I'm looking to promote an online business

On the pricing page, the purple tick icons don't look 100% correct.

I'm not sure exactly how you can fix it, but please try.

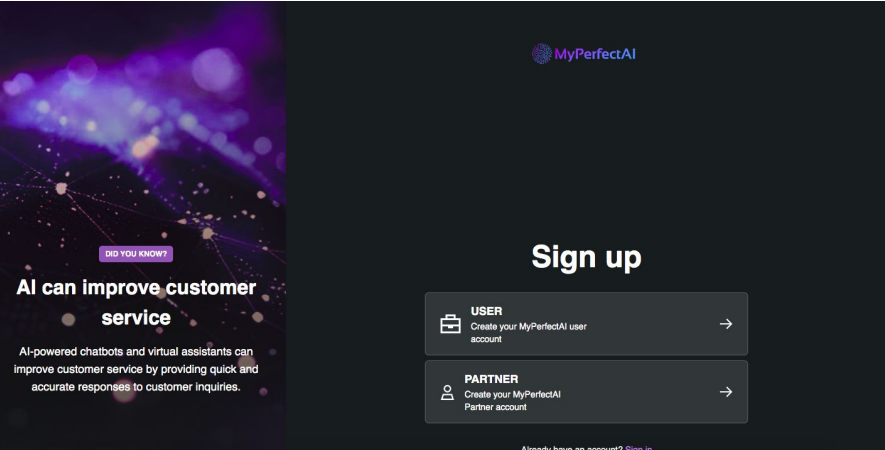

As you can see, it looks better in the Figma design.

I'm not sure if it's a image file, or actually part of the text. Have a look in Figma (dev mode) and see how to fix it.

Current website;

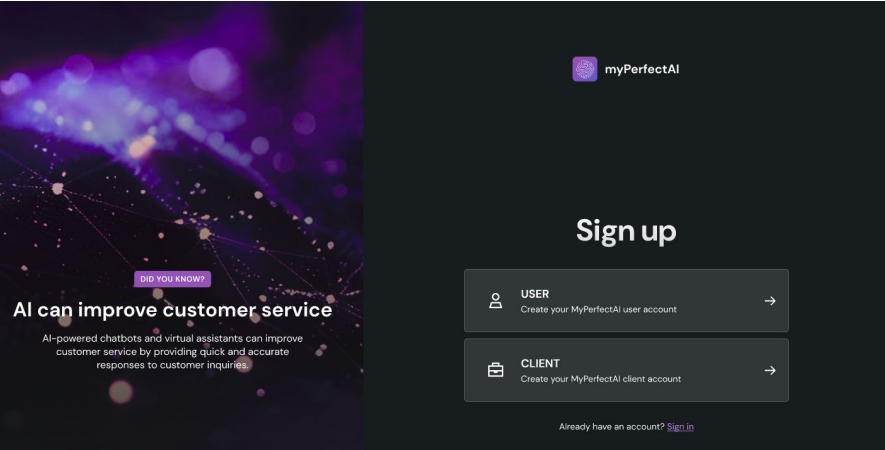

This is for all the sign up/sign in/verify email/forgot password etc pages:

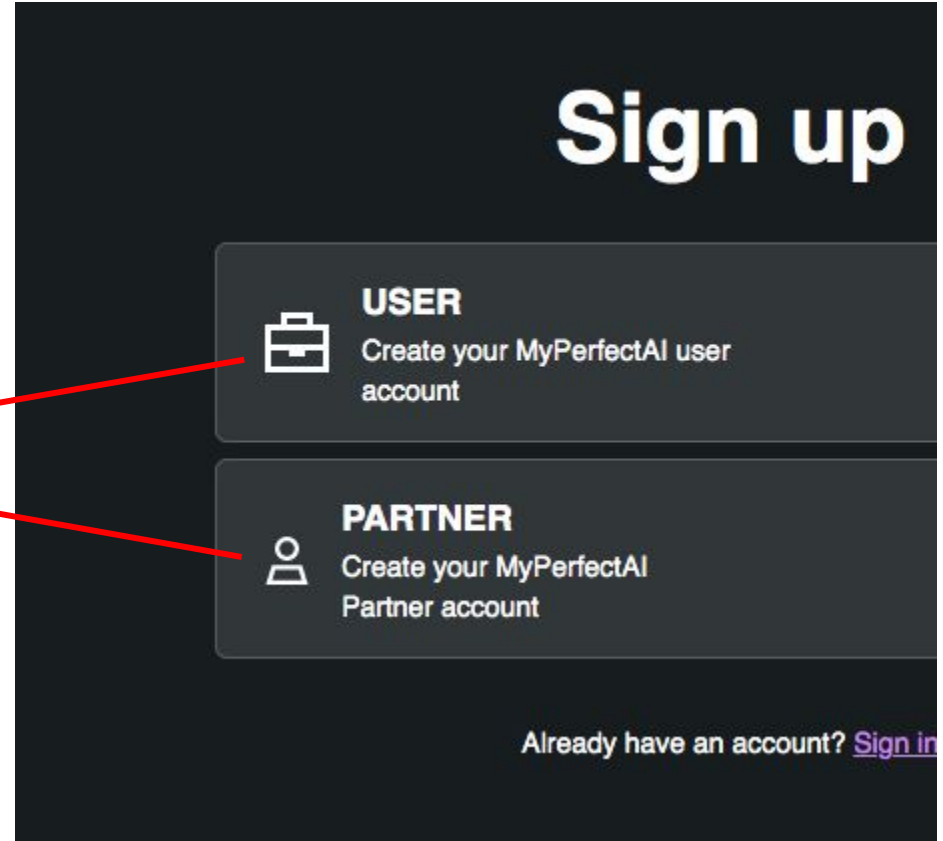

As you can see, the layout is not 100% correct.
The section on the left needs to be wider.

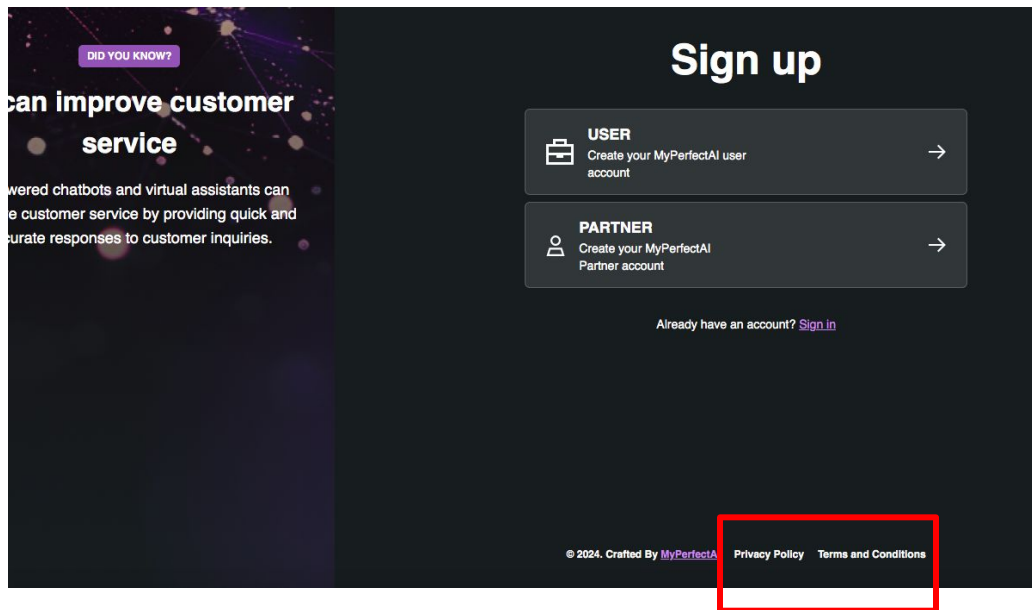

Currently, it looks like ~30/70
It should be ~40/60

Figma design:

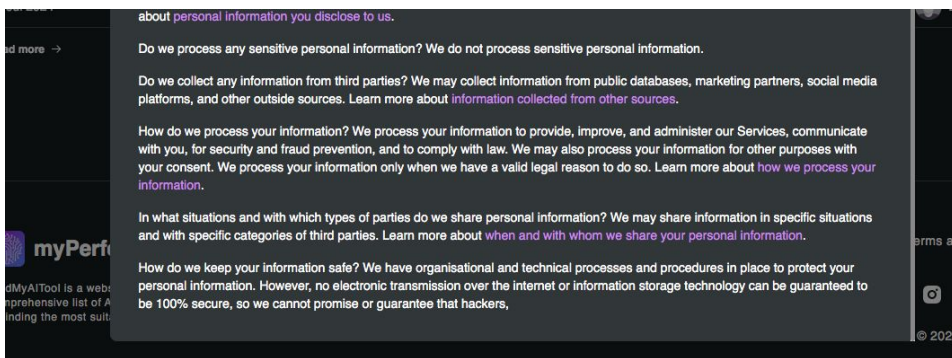

On desktop, the icons for user and partner are the wrong way around. They need to be reversed. It is correct on mobile.

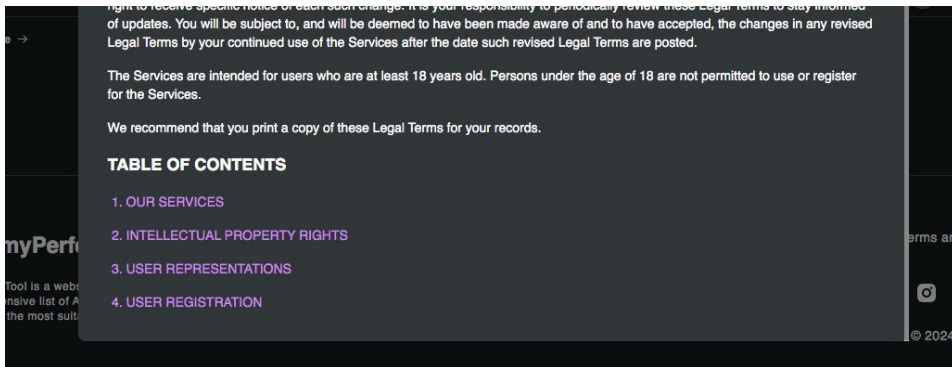

This is for all the sign up/sign in/verify email/forgot password etc pages:

Clicking the 'Privacy Policy' or 'Terms and Conditions' currently doesn't do anything. The pop-up window doesn't open.
Easy fix.

The full Privacy Policy and Terms and Conditions aren't installed, currently it's just the top section of each.

Do you need me to send the original policies (through Termly I think)? Or can you just copy and paste from the old website?

(This is for all sign up/in/verify email etc pages):

Too much empty spaces. In the Figma design, you can see there's less empty spaces

Not enough empty spaces. In the Figma design, you can see there's more empty spaces here.

Double-check each page in Figma and make sure the proportions/layout is accurate.

Current website:

A screenshot of a sign-up form on a dark background. The form has several input fields: 'FIRST NAME' (containing 'Joshua'), 'LAST NAME' (containing 'Grant'), 'EMAIL ADDRESS' (containing 'josh@myperfectai.app'), 'PASSWORD', and 'CONFIRM PASSWORD'. Below these is a checkbox labeled 'I agree to the Terms and Conditions and Privacy Policy'. At the bottom is a purple 'Sign Up' button and a link 'Already have an account? Sign in'. Red lines and boxes highlight areas of the form: a box around the first two name fields, a box around the email field, a box around the password and confirm password fields, and a box around the checkbox and 'Sign Up' button.

A screenshot of a sign-in form on a dark background. It has two input fields: 'EMAIL ADDRESS' (containing 'willie.jennings@example.com') and 'PASSWORD'. Below these is a purple 'Sign in' button and a link 'Don't have an account? Sign up'. A link 'Forget password' is also visible.

Figma design:

A screenshot of a sign-up form in a Figma design tool. The form has input fields for 'FIRST NAME' (containing 'Ronald'), 'LAST NAME' (containing 'Richard'), 'EMAIL ADDRESS' (containing 'willie.jennings@example.com'), 'PASSWORD', and 'CONFIRM PASSWORD'. Below these is a checkbox labeled 'I agree to the Terms and Conditions and Privacy Policy'. At the bottom is a purple 'Sign up' button and a link 'Already have an account? Sign in'. Green lines and boxes highlight areas of the form: a box around the first two name fields, a box around the email field, a box around the password and confirm password fields, and a box around the checkbox and 'Sign up' button.

I can't show it with a screenshot, but there is a bug/glitch when I open the homepage.

When the page loads, the background image moves. It's not just loading in - it actually moves (from left to right I think).

This is on both desktop and mobile.

None of the other pages have this issue.

Please test it yourself and see, then fix it.
